GIOVANNI ALBERTO VERZA

PERSONAL INFORMATION

Date of Birth: September, 7th, 1989
Nationality: Italy
Languages: Italian (Native), English
Address: via Euganea 36, 35141, Padova (PD)
E-mail: giovanni.verza@pd.infn.it, giova.verza@gmail.com
ORCID: https://orcid.org/0000-0002-1886-8348
Website: https://giovanni-verza.github.io/

RESEARCH WORK AND EDUCATION

PostDoc 2022 – now
INFN sezione di Padova

PhD in Physics 2018 – 2022
Università degli Studi di Padova

Master in Physics 2016 – 2018
Università degli Studi di Milano

Bachelor in Theology 2011 – 2016
Facoltà Teologica dell'Italia Settentrionale

Bachelor in Physics 2008 – 2011
Università degli Studi di Milano Bicocca

SCIENTIFIC PRODUCTION

Publications

- S. Contarini, **G. Verza**, A. Pisani, N. Hamaus et. al., *Euclid: Cosmological forecasts from the void size function*, A&A forthcoming, DOI:10.1051/0004-6361/202244095, arXiv:2205.11525.
- N. Hamaus, M. Aubert, A. Pisani, S. Contarini, **G. Verza** et. al., *Euclid: Forecasts from redshift-space distortions and the Alcock-Paczinski test with cosmic voids*, A&A 658, A20 (2022), DOI:10.1051/0004-6361/202142073, arXiv:2108.10347.
- **G. Verza**, A. Pisani, C. Carbone, N. Hamaus, L. Guzzo, *The void size function in dynamical dark energy cosmologies*, JCAP12(2019)040, DOI: 10.1088/1475-7516/2019/12/040, arXiv:1906.00409.

Preprints

- **G. Verza**, C. Carbone, A. Renzi, *The halo bias inside cosmic voids*, arXiv:2207.04039.
- M. Bonici, C. Carbone, S. Davini, P. Vielzeuf, L. Paganin, V. F. Cardone, N. Hamaus, A. Pisani, A. Hawken, A. Kovács, A. Caminata, S. di Domizio, M. Pallavicini, G. Testera, S. Tosi, M. Aubert, S. Contarini, **G. Verza**, I. Tutusaus, S. Escoffier, S. Clesse, V. Pettorino, Z. Sakr, D. Sapone, V. Yankelevich, et al., *Euclid: Forecasts from the void-lensing cross-correlation*, arXiv:2206.14211.

In preparation

- **G. Verza**, C. Carbone, A. Pisani, A. Renzi, *Void counts to disentangle dark energy and neutrinos*, **to appear**.

SCIENTIFIC COLLABORATIONS

Euclid Consortium Member from 2018
Galaxy clustering science working group, Voids work package.

- Co-lead of the Euclid Standard Project *Euclid: Forecasts from redshift-space distortions and the Alcock-Paczinski test with cosmic voids*.

Collaborating on Subaru Prime Focus Spectrograph predictions for void statistics

PRESENTATIONS

Cosmology with cosmic void statistics in galaxy surveys — September 2022
PUMA22, Sestri Levante (Italy)

Euclid: Cosmological forecasts from the void size function — May 2022
Euclid Consortium Meeting, Oslo (Norway)

Cosmology with cosmic void statistics — May 2022
Euclid Consortium Meeting, Oslo (Norway)

The Void Size Function in Dynamical Dark Energy Cosmologies — September 2020
Convegno SIF online

The Void Statistics in Dynamical Dark Energy Models — February 2020
3th Meeting Nazionale Collaborazione Euclid, Bologna (Italy)

The Void Size Function in Dynamical Dark Energy Cosmologies — February 2020
Euclid Joint Meeting, Paris (France)

Cosmic voids to probe Dark Energy — April 2019
UniVersum, Milano (Italy)

CONFERENCES AND WORKSHOPS

PUMA22: Probing the Universe with Multimessenger Astrophysics — September 2022
Sestri Levante (Italy)

Euclid Consortium Meeting — May 2022
Oslo (Norway)

Euclid Consortium Meeting — May 2021
Remote form (Lausanne, Swiss)

4th Meeting Nazionale Collaborazione Euclid — February 2021
Remote form

Convegno SIF — September 2020
Remote form

Euclid Consortium Meeting — May 2020
Remote form (Barcellona, Spain)

3rd Meeting Nazionale Collaborazione Euclid — February 2020
Bologna (Italy)

Euclid Joint Meeting — February 2020
Paris (France)

Fundamental Physics with Future CMB Probes — October 2019
SISSA Trieste (Italy)

UniVersum — April 2019
Milano (Italy)

Euclid and Beyond. The Many Faces of Modern Cosmology — February 2019
CNR Roma (Italy)

SCHOOLS

Programming paradigms for GPU devices — November 2021
CINECA remote form (Bologna, Italy)

17th advanced school on parallel computing — March 2021
CINECA remote form (Bologna, Italy)

Containerization in high performance computing — November 2020
CINECA remote form (Bologna, Italy)

Advanced Euclid School: The Science of Future Cosmological Surveys — June 2020
Remote form (Les Houches, France)

Astrostatistics school: Bayesian Methods for the Physics Sciences June 2019
Milano (Italy)

Theoretical Aspects of Astroparticle Physics, Cosmology and Gravitation March 2019
GGI Firenze (Italy)

N-body techniques for astrophysics October 2018
Course of PhD school in Astronomy, Università di Padova (Italy)

DIGITAL COMPETENCES

Programming languages: Python, C++, Mathematica
Containerization: Singularity, Docker
Scientific codes: CAMB, CLASS, Pylians, VIDE, CorrFunc, CUTE, PowerI4, various cosmological emulators, etc.
General skills: Linux system, High Performance Computing clusters, parallel computing, basics of GPU acceleration programming

OUTREACH ACTIVITIES

Conference: Illuminiamo l'Universo Oscuro. December 2021
Energia e materia oscura, le componenti che determinano l'evoluzione dell'Universo.
"Let's light up the Dark Universe. Dark matter and dark energy, the components that drive the evolution of the Universe."
